Stainless Steel Wine Barrel

PAUL MUELLER COMPANY

THE RIGHT SIZE FOR STORING AND AGING

Make this next crush season the easiest yet! Stainless steel wine barrels from Paul Mueller Company come in a just-right 75 gallon size. Big enough to free up room for that next batch, small enough to be mobile in your winery.

HANDCRAFTED

Using only the highest grade 304 stainless steel and semi-automatic weld techniques to produce unrivaled quality and beauty. You will want to show them off in your tasting room!

BETTER DRAINAGE

Optimal output of your stainless steel wine barrel is contingent on the barrel's interior design. Our proprietary, tapered structure allows all the wine to drain out. This maximizes your cleaning process and ensures all soap, rinsing water, and sanitizer are completely expelled.

VERSATILITY

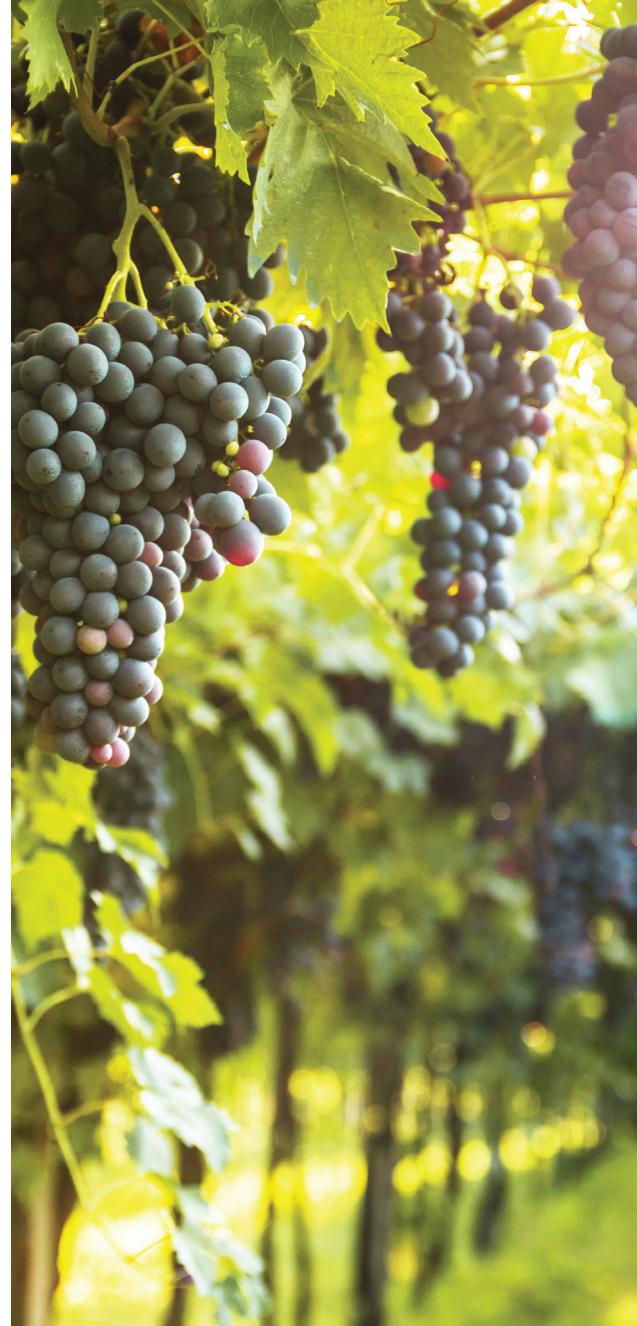

Our stainless steel barrels are air-tight, keeping your product protected from outside elements. Reds or whites will shine in our clean barrels. The ferrule lets you add fruit, oak, or any other elements you desire.

EASY STORAGE

Unlike other stainless steel wine barrels on the market, Paul Mueller Company wine barrels fit just like oak barrels on a Western Square holder. Our proprietary taper and angle ring means our barrels won't rock out. Mueller wine barrels feature a 2" tri-clamp connection and have fixed ends.

MUELLER® WINE BARREL SPECIFICATIONS

Barrel Size	75 gallons
Length	38 3/4"
Width	25 5/8"
